

SURGICAL EQUIPMENT

General Surgery Instruments

Core hand instruments used in almost every operating theatre — artery forceps, tissue forceps, scissors, needle holders and retractors. Supplied as loose instruments or as pre-configured trays matched to your surgical protocol. All items are forged from surgical-grade stainless steel and finished for repeated autoclaving.

Highlights

- Forged AISI 410/420 stainless steel
- Satin anti-glare finish
- Custom tray configuration
- Laser-marked traceability

Applications

General surgery • Trauma & emergency OT • Day-care surgery
